

# Kaltura Video Quiz

The video Quiz option in Kaltura allows instructors to add questions within the video as an opportunity to check for student understanding of the materials. In addition, instructors can add a pre-test document in PDF format so that students can review and answer questions prior to taking the quiz. If the quiz is posted to a Blackboard Content area, instructors can download analytics including average score, visits, plays and average view time. Instructors can review scores within My Media, and download a PDF of the results by user. Quizzes cannot be submitted until all questions have been answered.
