

# Install Office 2016 (Mac)

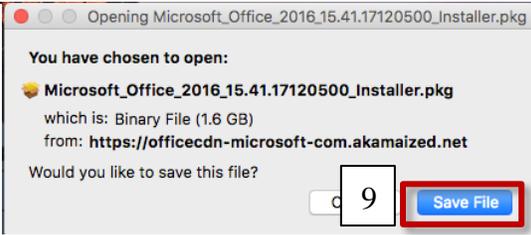

Office 2016 replaces older versions of Office on your Mac. This version of Office is compatible with the Mac OS, and includes a version of Outlook client.

**Important:** Before downloading, close all Office programs. If Office 2011, is installed on your computer, be sure to open Applications and move the Office 2011 icons to the trash can. Empty the trash to fully delete Office 2011

	<ol style="list-style-type: none"> <li>1. Go to <a href="http://portal.office.com">http://portal.office.com</a></li> <li>2.
